Document 1: US 5900296 A (AG Technology Co., Ltd.), 04 May 1999

Document 2: US 5780371 A (Saint-Gobain Vitrage S. A.), 14 July 1998

Document 3: US 6114039 A (Saint-Gobain Vitrage S. A.), 05 September 2000

Claims 1 to 16

Claims 1 to 16 lack novelty.

Documents 1 to 3 disclose glass substrates that have been subjected to a chemical strengthening treatment, and said substrates have compositions which overlap with the scopes of the compositions that are set forth in the present application. Likewise, documents 1 to 3 also disclose information recording media which employ said substrates.

In addition, although documents 1-3 do not explicitly disclose values for physical characteristics such as the glass transition temperature, the Young's modulus of elasticity, the flexural strength after being subjected to a heat treatment at a specific temperature and the like, it is impossible to differentiate between these inventions as substances; therefore, the inventions in question can be expected to exhibit similar values for the characteristics in question.
